--- SEE OFFICE ACTION ON THE FOLLOWING PAGES ---

Art Unit: 1771

1. Claim 24 is objected to because of the following informalities: It appears that there is a typographical error and that the word "form" in line 2 of the claim should be written as "from".

Appropriate correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 13-19, 22, 25-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Oellerking, U.S. Patent No. 4,286,007.

Oellerking discloses a fabric comprising a welding portion and a fixing portion which is bonded to a substrate. The welding portion may be continuously formed across the perimeter of the fabric or it may be discontinuous. The welding portion comprises a weldable plastic material. The fabric may also comprise a fixing portion, (i.e., a non-coated portion). Since a fabric necessarily comprises fibers and since the weldable material comprises a thermoplastic coating on a fabric, Oellerking inherently teaches that the welding portion comprises warp fibers which are coated with a thermoplastic material. See fig. 1 and col. 2, lines 38-55; and col. 3, lines 3-15.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 1771

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 13-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oellerking, U.S. Patent No. 4,286,007. Oellerking discloses a fabric comprising a welding portion and a fixing portion. The welding portion may be continuously formed across the perimeter of the fabric or it may be discontinuous. The welding portion comprises a weldable plastic material. The fabric may also comprise a fixing portion, (i.e., a non-coated portion). Since a fabric necessarily comprises fibers and since the weldable material comprises a thermoplastic coating on a fabric, Oellerking inherently teaches that the welding portion comprises warp fibers which are coated with a thermoplastic material. Oellerking differs from the claimed invention because Oellerking does not specifically teach applying the welding portion so that it is the middle of the fixing portion, so that there are two fixing portions connected edge-to-edge together, so that the two welding portions are attached to the middle of said fixing portion, so that two welding portions are branched from one edge of said fixing portions. However, since Oellerking does teach that the weldable coating is applied to facilitate bonding the fabric to a substrate, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have applied the weldable coating to the fabric in the pattern which would have most facilitated the bonding of the fabric to a substrate. See fig. 1 and col. 2, lines 38-55; and col. 3, lines 3-15.
6. Applicant's arguments with respect to claims 13-26 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 1771

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Starlinger Huemer, U.S. Patent No. 5,845,995.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, ~~THIS ACTION IS MADE FINAL~~. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
